RE: Country of Origin Labeling

The following petitions were signed at the recent MATE (Montana Agriculture Trade Exposition). The undersigned want Country of Origin Labeling as born, raised and processed in the United States. These people want to know where their meat and food comes from. We need to keep track of the food that comes into the United States from foreign countries.

There are 19 pages including this cover page.

Outdoor Meat Market in Ecuador

Again, COOL anyone? Shown is an outside 'fabrication plant' in Ecuador. The tent in the foreground is where the meat is sold and can be seen on the front page. Notice the stumps of wood that are used as a cutting board. Do you suppose there is any cross contamination that may occur? Photo courtesy of Brett DeBruycker. *Western Livestock Reporter*

COOL anyone? Brett DeBruycker and Dennis McDonald, both representing R-CALF USA and US cattlemen, attended the FTAA Business Forum in Ecuador. Brett is shown at a 'meat market' in Ecuador. If FTAA comes to fruition, this meat could end up on a US dinner table! And no this picture is not taken inside and no it is not below freezing temperature either! Look for other photos provided by DeBruycker in this issue.

Secretary of Agriculture

Ann Veneman:

We the undersigned want COOL, (Country of Origin) implemented for all meat and produce sold to America. This means: NO EXCEPTIONS or LOOPHOLES!
